

# High Dose Cobalt-60 Irradiations - Order Price List

1 January 2012

## High Dose Cobalt-60 Irradiation Service (RD.07.01)

Dosimeter type	Dose range	Net price
Standard calibration*	Up to 40 kGy	£ 700

\* For Service RD.07.01, a standard calibration represents, for Red Perspex, 4 replicates at 6 doses up to a maximum dose of 40 kGy. Prices for other calibrations available on request. A calibration curve can be fitted to customer supplied data at an extra cost of £125 per curve when arranged in combination with a calibration irradiation.

### Ordering

An official order or order number is required before work can begin. To place an order either email directly to [chemdos@npl.co.uk](mailto:chemdos@npl.co.uk) or FAX on +44 (0)20 8943 6680. In both cases written confirmation by post is required.

Please ensure all documentation is clearly marked for the attention of the appropriate dosimetry specialist, as listed below. The postal address is: National Physical Laboratory, Radiation Dosimetry, Teddington, Middlesex, United Kingdom, TW11 0LW.

Payment terms are Net 30 days. All orders are subject to NPL Terms & Conditions - available on request.

### Shipping

Prices do not include shipping, all shipping costs will be added to the invoice. Despatch is normally immediately after irradiation of the samples. All dosimeters are shipped by courier or equivalent carrier.

### Further Information

More details about chemical dosimetry services can be found at the chemical dosimetry home page: <http://www.chemdos.npl.co.uk/>. Alternatively, if you would prefer to speak to one of our dosimetry specialists then please contact:
